Bring Substantial Benefits to the People

One June day in 2017, respected Comrade **Kim Jong Un** visited a newly-built dental hygiene supplies factory.

Feasting his eyes on its panoramic view, he expressed great satisfaction over the fact that another smart factory conducive to promoting the people's health has been built.

He said: It is good that the Pyongyang Dental Hygiene Supplies Factory has been built.

During my guidance trip to the Pyongyang Cosmetics Factory in February 2015, I had an idea that toothpaste should be produced not by a cosmetics factory but by an exclusive dental hygiene supplies factory in order to develop the sector of dental hygiene supplies in the future. So, I took a measure for building this factory, and now a small toothpaste production line has been turned into the present modern, comprehensive Pyongyang Dental Hygiene Supplies Factory.

Looking round the factory, he said: The Party ensured that this factory has been built to protect and promote the people's health and provide them with cultural life, not to give publicity to it. After going into operation, the factory should put its production on a normal footing so as to bring substantial benefits to the people.

Then, he gave detailed instructions on equipping the factory with a modern toothbrush workshop and a dental hygiene supplies institute and providing it with enough raw and other materials, and other problems arising in putting its operation on a normal basis.
