Real Meaning of a Modernized Farm

One January day in 2024, respected Comrade **Kim Jong Un** visited the Kwangchon Chicken Farm.

After greeting him, the official of the farm tried to explain the artist's impression of the farm.

But Comrade **Kim Jong Un** asked him first how the farm was when compared with other chicken farms. The official said in excitement that, though he had worked in the sector of poultry farming for a long time, it was the first time for him to see such a completely modern and wonderful chicken farm.

Laughing heartily, Comrade **Kim Jong Un** said with satisfaction he could see that the farm was a modern one only from the manager's phrase "completely".

Then he learned about the number of eggs a hen laid in a year and the amount of feed used in the farm and other chicken farms, asking whether the farm paid off in practice.

The manager replied confidently.

With a broad smile on his face, Comrade **Kim Jong Un** said: Only when the farm proves effective in production, can it be called a really modernized farm.

His intention was that the farm should not only be equipped with advanced facilities but also produce large amounts of meat and eggs so as to bring substantial benefits to the people.

The officials were firmly determined to work harder for the good of the people, true to his ennobling intention.
